WELCOME TO HOLD'EM PROFILER

With Hold'em Profiler you can upload your hand histories to be stored online, ensuring you never lose them. Once you've uploaded hands, Hold'em Profiler will help you use these hands to exploit your opponents like never before.

With countless different filters, Hold'em Profiler can be a little overwhelming at first. But as long as you follow this step-by-step guide, you'll be up and running in no time.

We'll get started at the <u>Holdem Profiler Home Page</u>:

If you already have a PokerProLabs account you can login on the right side of the screen, otherwise you will be asked to fill in the following information to create an account:

In the All Players Summary for Tournaments, each player name has been given a specific Player Type label. Various statistics about the types of tournament played and money won will also be visible. The statistics displayed here can be customized by clicking the Change Statistics spanner at the bottom left side of the summary.

The default Player Types and their respective icons are listed below.

Player Typ	es:		Fish: Always finds it hard to fold. Don't bluff them, bet big with strong hands to get maximum value.
Icon	Name	Priority	GP/Tight: Plays mostly good hands and plays them aggressively. Mixes it up a little too though. Avoid them unless you also have a good hand.
1	Fish	1	Gambler: A gambler loves to chase their draws. Raises often nostflon
	Good Player - Tight	2	Deele Only plays promium hands. Make money from yoaks by stealing their blinds.
	Gambler	3	Rock: Only plays premium natus. Make money from rocks by stearing their binds.
-	Rock	4	Calling Station: Loves to call. Don't try to bluff them, instead bet big with decent to good hands and you will get paid off nicely.
	Calling Station	5	Loose/Aggressive: This player plays a wide range of hands aggressively. Not as crazy
•	Loose/Aggressive	6	as a Gambler, it is hard to put them on a hand. Sometimes you might have to call them down with a hand weaker than you normally would.
	Loose/Passive	7	
- (A)	Tight/Aggressive	8	Loose/Passive: similar to a Fish, this player loves to can so just bet for value.
_ ₩ _	Tight/Passive	9	Tight/Aggressive: Similar to GP/Tight, be careful as these guys are good.
Å	Wild	10	Tight/Passive: Like the Rocks, just steal their blinds and watch out if they raise you.
	Super Tight	11	Wild: These players are unpredictable but will bluff away their stack if you're patient.
X	Cood Player - Loose	12	Super Tight: If he doesn't have a huge hand he isn't playing. Steal his blinds.
9	Good Hayer - Loose	12	GP/ Loose: A more cautious Loose/Aggressive. Hard to play against, keeps you guessing as to if they have it or if they are bluffing.

If you are using SuperHUD, this will integrate with Hold'em Profiler to show the Player Type icons on your table HUD, so you can exploit your opponents' weaknesses directly in-game.

ALTERNATIVE HAND HISTORY UPLOAD METHODS

As well as Upload Hands, you also have the option to Upload Text or Auto Upload

To upload raw text Hand Histories simply choose the poker site you got the Hand History from, paste the history into the uploader, and hit Upload.

TOURNAMENT REPORTS - ALL PLAYERS

In the All Players section there are three options. Summary was already shown in Getting Started - Tournaments. Summary by types and Summary by all types are quite similar to the Summary page you are familiar with.

Summary by types allows you to see a summary for specific types of tournaments. Clicking on a tournament type will show you only players and hands from those tournaments.

Positions summary
Positions by table size

Positions has two reports that you can use to assess positional play. Positions summary separates a player's statistics based on what table position they were in for the hand. Positions by table size also does this, but separates different table sizes from each other eg. Button (6 Max) will be separated from Button (9 Max).

The Positions summary allows you to view statistics by position, identifying player traits that may only occur when the player is in a certain position.

Clicking on a position will bring up the Preflop chart underneath the report, which shows how that player plays specific hole cards from that position.

Positions by table size is almost identical to the Positions summary shown above. The one difference you can see in Positions by table size below, is that now the same positions (eg. "Button") have been separated based on table size. This is important to distinguish since most players play completely differently when the table size is 9 Max (Full Ring) compared to 2 Max (Heads Up).

TOURNAMENT REPORTS - CARDS

In the Cards section there are five tournament reports.

These reports allow you to look at how someone played specific hole cards they held Preflop, or how they played their Flop Hand, Turn Hand, River Hand or the Final Hand they had.

Preflop allows you to see stats for each preflop hand that an individual player held. Clicking on a specific hand will allow you to see how the player played those cards from each position.

Turn Hand and River Hand are identical for the Turn and River as Flop Hand is for the Flop. The only difference is that River Hand will not include draws as it is no longer possible to have a draw on the River.

Final Hands will show the final categories of hands and the corresponding stats for these hand groups. Hands that did not see a flop, or where the hole cards are unknown, will be displayed as "na" (not applicable).

This means that for all players other than yourself (as you always know your own hole cards), Final Hand will only display hands that went to showdown. Clicking the hand category will show the hole cards used to make that hand underneath in the Preflop chart.

TOURNAMENT REPORTS - PREFLOP CARDS CHART

The Preflop Cards Chart will illustrate which hands are profitable and which are not. **Green** hands have won chips overall, while **Red** hands have lost chips.

Black hands either won exactly 0 chips overall, or no hands with those specific hole cards have been imported for that player.

The Card Chart is most useful for checking your own hands, to see what hands you are playing profitably and what hands are losing you money and should be folded instead.

TOURNAMENT REPORTS - ALL HANDS

All Hands is the last tournament report, and it is simply a list of every tournament hand that you have imported into Hold'em Profiler.

You can also use All Hands to see all hands for other players as well, by using the Change button and selecting another player.

All Hands allows you to quickly see the hole cards, action on every street, and overall results.

Clicking the \boxdot button will allow you to expand a particular hand out into even more detail. You will be given the option to either View in Text or watch the hand in the Replayer.

View in Text will let you see the hand in raw text with accompanying images for the hole cards

Watch in Replayer will bring up Holdem Profiler's hand replayer where you can watch the hand play out exactly as at did at the time.

With <u>All Hands</u> you can mark the hands that are significant, so that you can view them later.

First check the hands you want using the checkboxes on the left. The hands will be highlighted in yellow. Right click on these hands and choose Mark Selected Hand(s) to mark the hands.

A red flag will appear next to the hands, indicating that they have been marked.

Marked hands can then be viewed using the Only Show Marked Hands checkbox in the top left side of the report.

ADVANCED HOLDEM PROFILER USE: CUSTOMIZATION & FILTERS

After you have become familiar with all of Holdem Profiler's various reports, you may then want to customize them and apply filters to even better suit your needs.

For both Cash Games and Tournaments, every report category except <u>All Players</u> will have the following toolbar:

For Cash Games the Update Tournaments Results button will not be there, but it will otherwise be identical. For All Players, you will see Poker Site: All Poker Sites Instead of Player: BluffPolice (iP) Change

Below is a description of all the functions of the menu bar:

Poker Site: All Poker Sites	Select which Poker Site you wish to view the summary for.
Player: BluffPolice (iP) Change	Select which player you would like to view the report for.
Date: All Hands 🔻	View only data from a selected date range.
Hold'em 🔻	View only a specific game type: Hold'em, Omaha etc.
Filter: No Filter	Apply a custom filter to the data (See Custom Filters)
T	Opens the Quick Filter toolbar
Update Tournaments Results	Updates Tournament Results via SuperHUD
Refresh	Refreshes the Report

Custom Filters, the Quick Filters Toolbar and Custom Statistics are described in more detail over the next few pages.

CUSTOM FILTERS

Clicking on the Edit button in the menu bar will allow you to create custom filters.

Main Filters will allow you to filter hands by basically any criteria you could imagine:

The custom filters can be saved for later use by clicking the Save As button. You can Load a saved filter to change it as many times as you want, and create variations on your favourite filters. Once you save a filter, it will appear in the Filter drop down menu in the main toolbar above the report.

As well as the Main Filters you can filter by Hold'em Hole Cards, as shown on the next page.

The Hole Cards Filter (only for Texas Hold'em) will allow you to create custom filters that only select a certain range of hands, by clicking on the hands you wish to filter. These can be combined with the Main Filters tab to give you a virtually unlimited scope of hand analysis.
